Reading

Read the text and answer the questions 1-5. Choose a, b, c or d.

This passage is about the Massachusetts Institute of Technology.

The Massachusetts Institute of Technology (MIT), located in the United States, is one of the best universities in the world for those who want to study science, engineering or technology. It is a place defined offering programmes that allow students to work on real-world issues through practical projects and research. Since it was created in 1861, MIT's research programmes have produced thousands of new technologies and provided solutions for many complex problems.

MIT's research centres, which include the Computer Science and Artificial Intelligence Laboratory (CSAIL) and the MIT Media Lab, support cutting-edge research in areas like artificial intelligence, robotics, renewable energy and biotechnology. Students and talented professors from different fields often work together, which helps generate new ideas and innovations.

In addition to its academic achievements, MIT is also known for its lively campus and numerous clubs, organisations and activities. Many of these are organised by the students themselves, and it is widely recognised that they not only connect students with similar interests, but also provide an opportunity for personal growth outside of the classroom.

All things considered, it is no surprise that MIT attracts the best of the best from all over the world. As the significant number of Nobel Prizes that have been won by former students in subjects such as physics and chemistry shows, the quality of students there is extremely high. Perhaps even more than MIT's world-famous name, this is a primary reason why many professors choose to teach and conduct research there.

1. What is the main purpose of the text?
 - a. to present the reader with facts about MIT's history
 - b. to explain why MIT is considered to be a top university globally
 - c. to provide some basic information about MIT's research programmes
 - d. to highlight MIT's most important achievements
2. What does the writer say about MIT in the first paragraph?
 - a. Its engineering courses are the most popular.
 - b. It is one of the oldest universities in the world.
 - c. It was initially created to invent new technology faster.
 - d. Its research programmes have had an extensive impact.
3. Which word is closest in meaning to **cutting-edge** in the first sentence of the second paragraph?
 - a. initial
 - b. advanced
 - c. competitive
 - d. knowledgeable
4. What does the writer say about the student organisations at MIT?
 - a. They are not given as much attention as the scientific research.
 - b. The majority of them focus on academic achievement.
 - c. They are viewed by many as an important part of the MIT experience.
 - d. Students organize them for the purpose of meeting others with similar interests.
5. In the third sentence of the fourth paragraph, what does **this** refer to?
 - a. the high quality of students at MIT
 - b. MIT's world-famous name
 - c. the number of former students that have won a Nobel Prize
 - d. the research conducted by the professors
